

Notes about this mod:

This graphic modification (mod) was designed by user Aviatrix for Virtual Families 2 by Last Day of Work (LDW). The mod is not an LDW product and is not supported by LDW. This mod converts your beanbag chairs into papasan-style chairs in a wide choice of colors. The files are named as follows:

COLORNAME_ChairBeanbagGreenStd.png

If you have not installed graphic mods before, read the post titled "Installation Instructions for Graphic Mods" in the Game Mods directory of the LDW Forums. The current URL for this post is:

<http://www.ldwforums.com/ubbthreads/ubbthreads.php?ubb=showflat&Number=233110#Post233110>

Make sure you copy the original images and save them elsewhere, or better yet make a copy of the complete Images folder so you always have a pre-mod backup.

To use the file to replace the green beanbag chair, remove the "**COLORNAME_**" part and copy it over the current **ChairBeanBagGreenStd.png** file - make a backup first! You can also replace other beanbag chairs by changing the "Green" part to one of the other colors available in beanbag chairs (currently Red, Org, Blue, or Brown).

If you are in Canada or Europe, imagine a U in the word "color" wherever it appears above.
